

Our Top 10 Favorite Online Teaching Tools

One

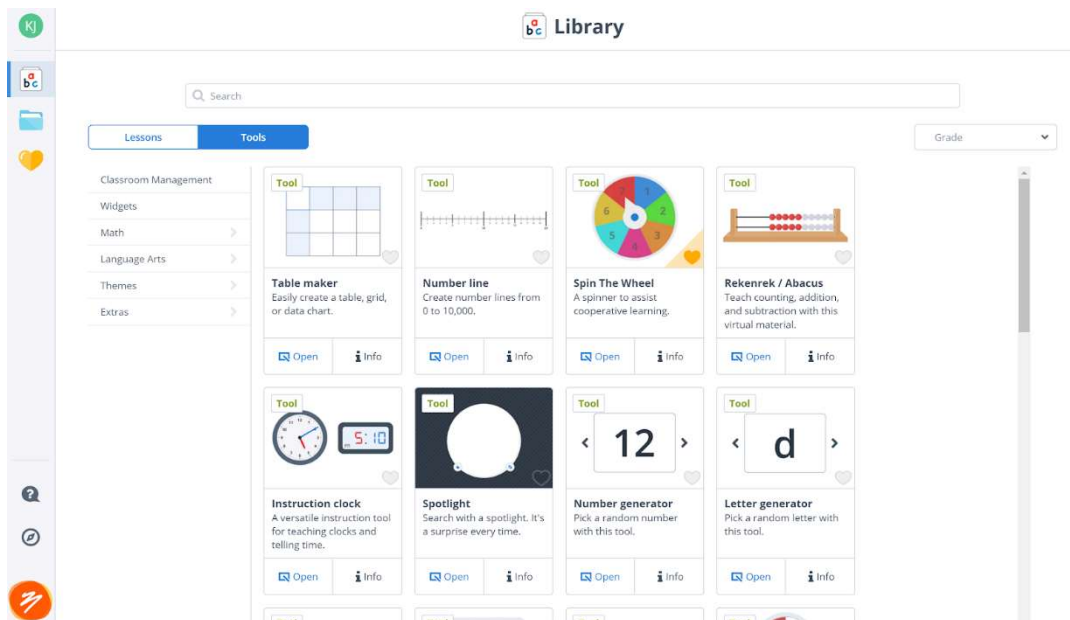

Prep an Assignment and upload your own content or create something new-with drawings, text, images, audio, links, and videos to provide instruction or create assessments. In 1:1 or group settings, students input drawings, text, images, and audio or answer fill-the-blank or multiple choice in response to teacher-created material. Teachers can see who needs help and how students are progressing through the assignment. Teachers provide individualized, [real-time feedback](#) and [grading](#) with an array of tools-directly on the canvas, in the help center. <https://classkick.com>

Two

Do you want a white board where you can post a working clock, lots of online tools, various videos and pre-made lessons? Genzy is great for modeling lessons and recreating the white board you may have had in your physical classroom. There are also some tools for behavior regulation.

<https://teacher.gynzy.com/>

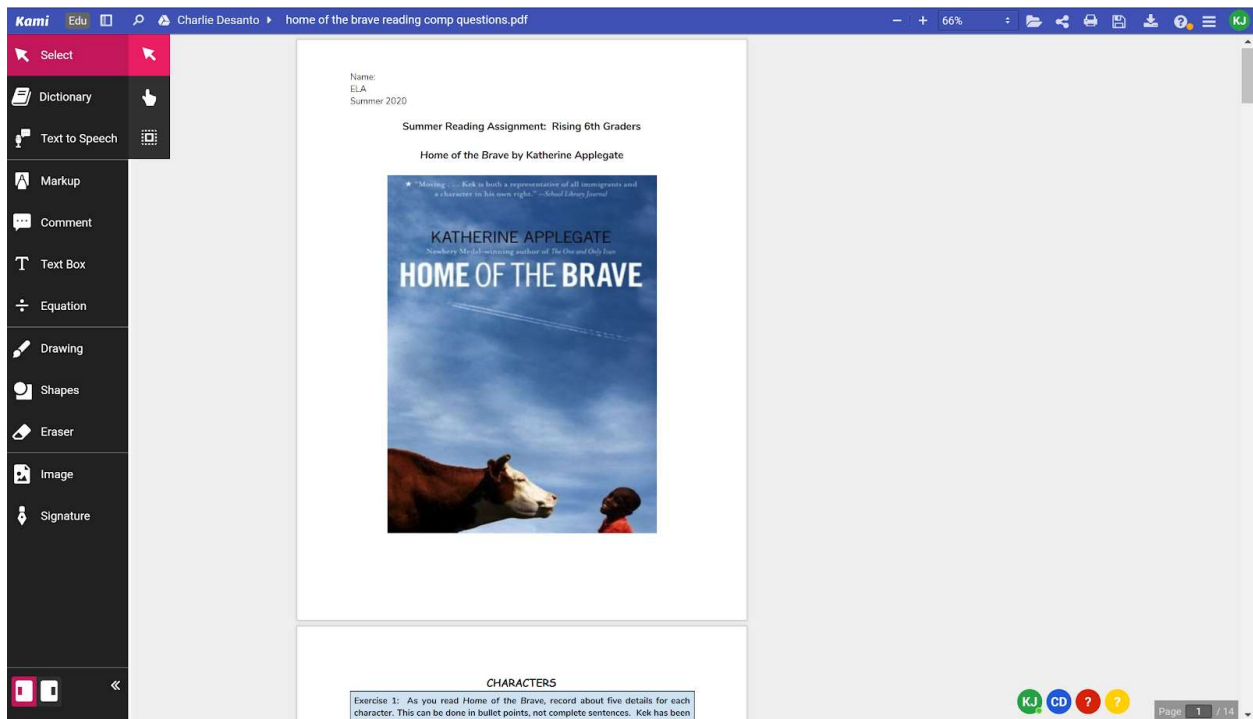

Three

Do you want a great online whiteboard where students can see your board and write on any worksheets or whiteboard space in their individual space? A board where you can see each student's responses on your screen so you can respond to them? Essential tool for providing live feedback to students during learning. I use this whenever I want students to demonstrate learning (they cannot see each other's responses). <https://whiteboard.fi/> You can check out whiteboard.chat too! This has some terrific math based tools and rolling dice.

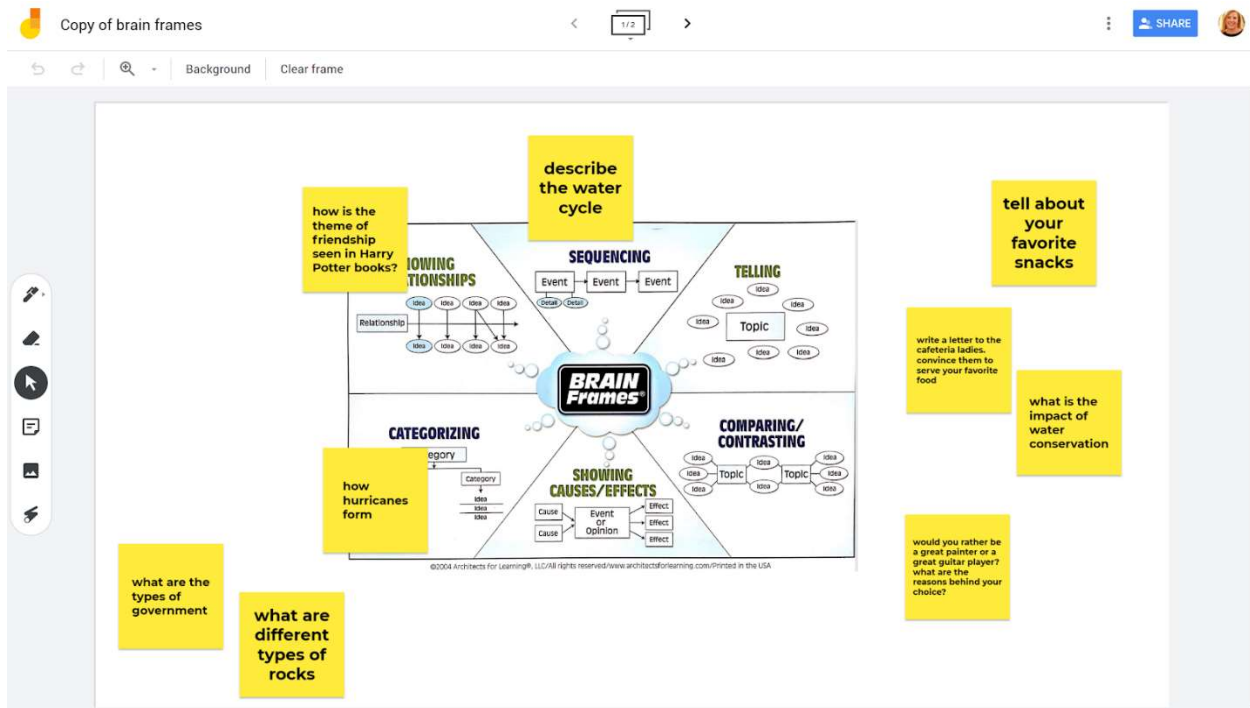

Four

Do you want a good resource for uploading worksheets and blank pages where you can work with individuals or groups of students during interactive teaching sessions? You can upload and save documents from your computer or Google Drive. Students can also use this for homework if they do not want to print worksheets and want to write online then submit their homework. One class can work collaboratively on one sheet, or multiple links can be created for individual or small groups of students. <https://web.kamihq.com/>

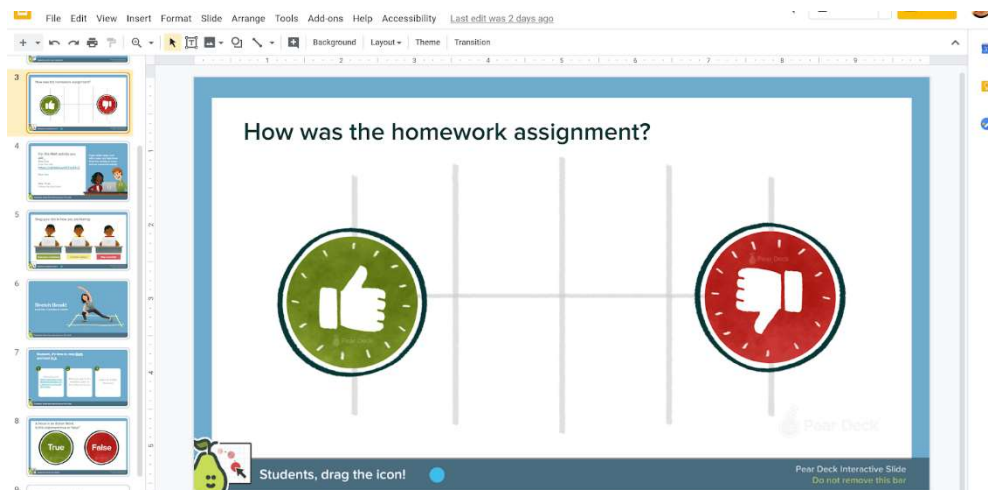

Five

Do you want to work on an interactive white board where individuals and small groups can engage with the photos and sticky notes? Jamboard is great for word building with letters, roots, etc., sentence building and labeling visuals. It is a simple tool with few features for even the youngest students who can get confused with many options on a toolbar. For this reason, it can also be a good tool for fun homework or independent assignments. It is found in Google Apps. <https://jamboard.google.com/>

Six

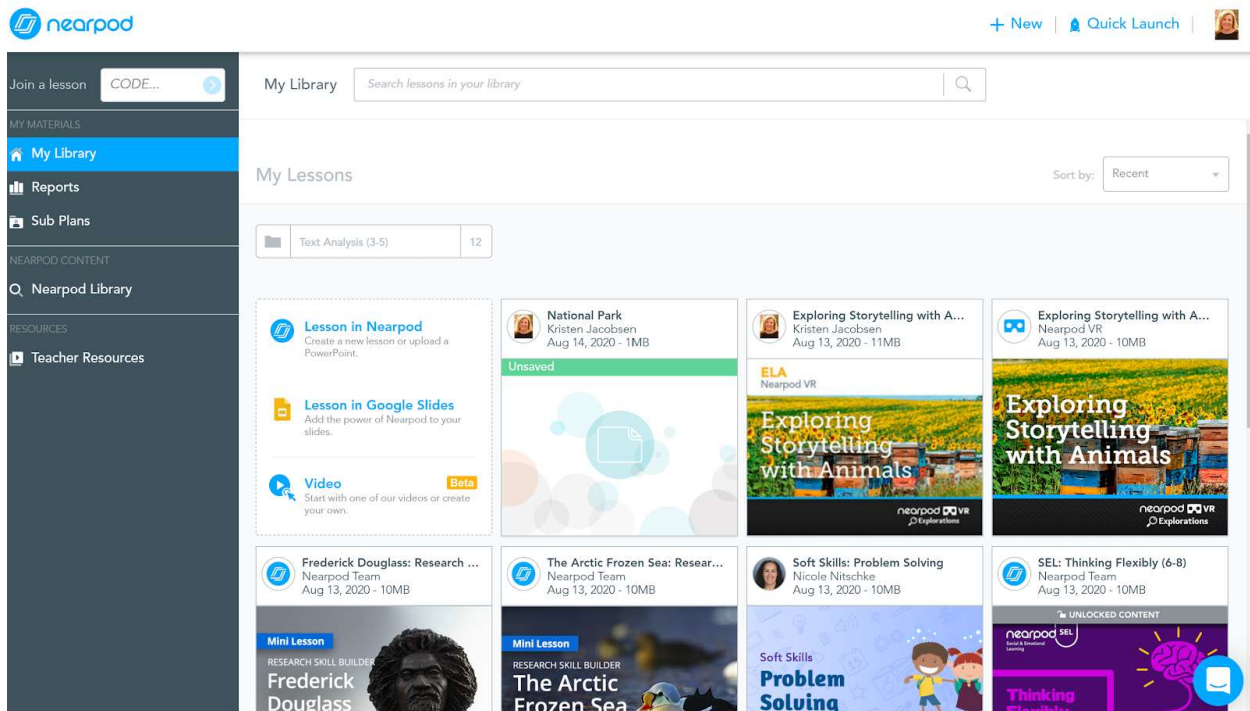

Do you want to use some of your favorite routines in the beginning, middle and end of your classes where students can actively engage with questions you ask? Try Peardeck add-on app on the Google Slides.

Seven

Do you want to engage students in active learning with your Google Slides? Add polls, field trips, videos and pre-made lessons? Build a library of interactive lessons with your own teaching content for

your Zoom sessions. Try the dynamic Google Slides Add-on called Nearpod <https://nearpod.com/>

Eight

Do you want to engage your students in a whole class quiz format game with the curriculum content? This can be used for gathering data on individual students and homework as well. Students enjoy this “low hanging fruit” during remote learning! Try <https://www.gimkit.com/>

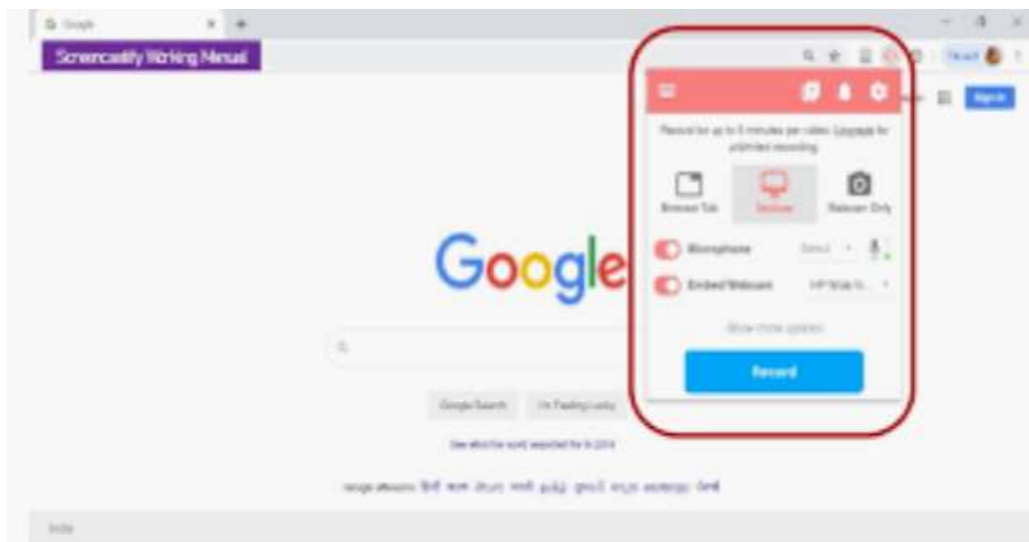

Nine

Do you want to record your instruction anywhere online, annotate any websites and save it to share with your students to watch at a

later time? Try the Google Chrome app Screencastify.

<https://www.screencastify.com/>

Ten

Do you want to be able to write on any screen, document, website, etc.? Epic Pen is an app that allows you to write anywhere. You can annotate Google Docs, slides, etc. Its best for live teaching as the screens do not save or record easily. <https://epic-pen.com/>

If you or students are not using an iPad or Surface laptop with a pen, and it's difficult to maneuver a laptop touchpad for handwriting, then Mouse Pens that can be found on Amazon can be a helpful tool for writing on screens.
